

Technical Specifications

Photograph

Description:

Matte coated translucent PET backlit film

- Compatible with solvent, eco solvent, latex and UV curable inks
- Recommended for both indoor and outdoor applications
- High quality image density and resolution
- Ideal for light boxes with high contrast
- Good for rigidity and flatness for easy installation

Roll Configurations: 54"X100', 60"X100', 87"X164' * on a 3" Core

Physical Specifications:

Basis Weight (grams/m²): 275

Caliper (mil): 9

Material: PET

Finish: Semi Matte

Lamination & Mounting

When laminating or mounting to a board or encapsulating, overlap the image with a 0.25" safe edge of laminate. This will help prevent damage to the print by avoiding moisture absorption or wicking. Use laminates of equal gauge when encapsulating to prevent image curl. Lamination will help extend the life of your print by reducing the rate of fade and protection against abrasion.

Solvent, Eco-solvent, UV Curable And Latex Compatibility

This product is universally compatible with solvent, eco-solvent, UV curable and latex wide format digital inkjet printers. This Backlit Film provides an expanded color gamut and higher ink saturation for richer, more brilliant colors. Individual results may vary. Test thoroughly for your specific application.
